We greatly appreciate the valuable feedback received during the review of our initial poster draft. With that, we have incorporated the suggested improvements into our final poster design. Specifically, we have addressed the following points:

1) Flow of Text: We have restructured the layout of the text to ensure a more coherent and intuitive flow of information throughout the poster.

2) Use of Full Protocol Names: In response to the request for clarity, we now consistently use the full names of the protocols, referring to them as the "Clinical Institute Withdrawal Assessment for Alcohol Scale (CIWA)" and the "Clinical Opiate Withdrawal Scale (COWS)."

3) Incorporating Protocols and Problems into a Scenario: We have integrated the CIWA and COWS protocols into a scenario, illustrating their application in a practical context, including the challenges and benefits they present.

4) Example in the Interrelationships Section: We have included a concrete example in the section discussing the interrelationships between the protocols, helping to elucidate the concept further.

5) Addition of References: We have included a minimum of 10 recent references (within the last five years) to support the information presented.

6) Perspectives – Client's/Patient's Personal Supports: Recognizing the importance of considering the client's or patient's personal supports, we have included a section dedicated to this aspect, highlighting the significance of these elements in the context of the protocols.

7) Removal of Contractions: We have eliminated contractions throughout the poster to maintain a professional tone, ensuring that the language used is consistent with academic writing standards.

8) New Photo for Next Post: We have used a different yet relevant photograph for the iteration of the poster, instead of using a cropped version of the current poster.

9) Use of In-Text Citations and Footnotes: We have incorporated in-text citations and footnotes to properly reference the sources and to enhance the academic integrity of the poster.

Thank you once again to those who provided feedback. Below is a list of the references we used for our poster.
